

## A: Quadrangulations decorated by spanning trees

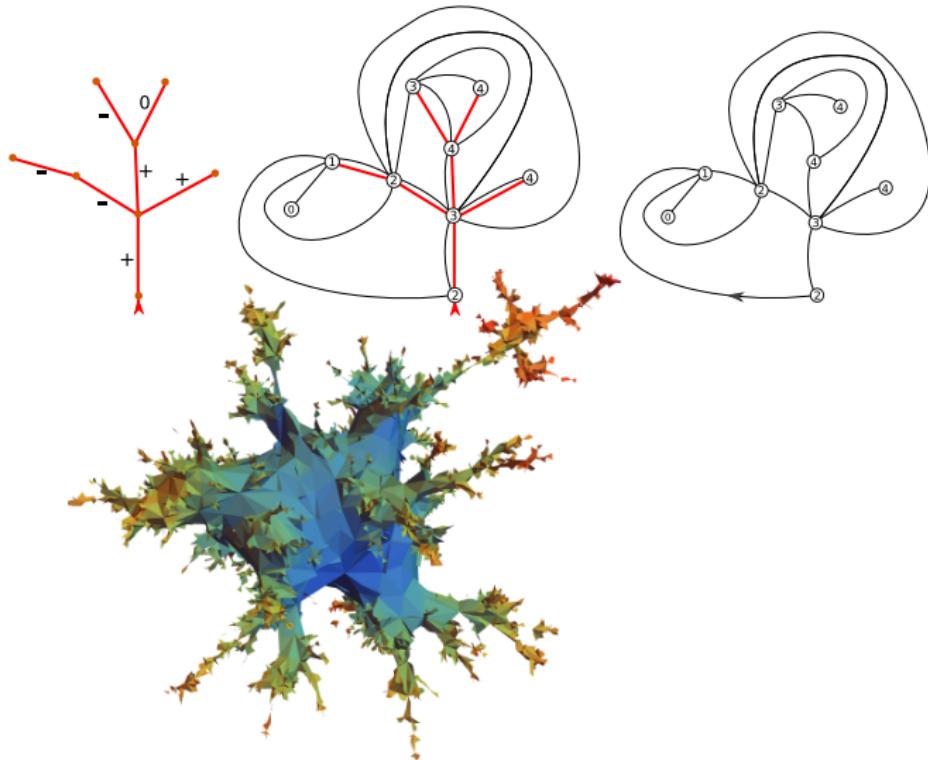

(Figure courtesy S. Sheffield)

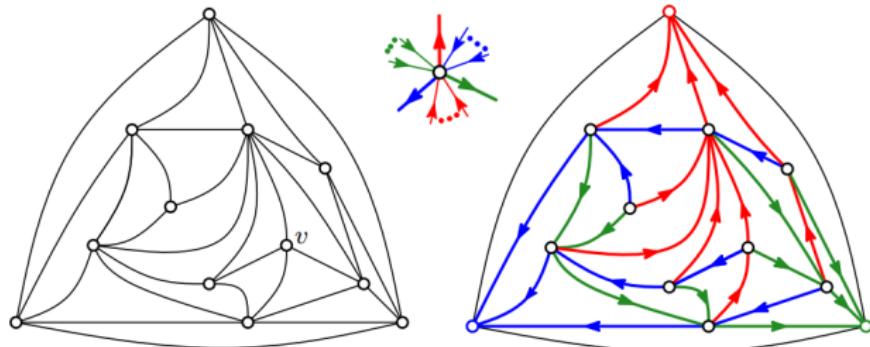

## B: Branched polymer / Uniform random tree

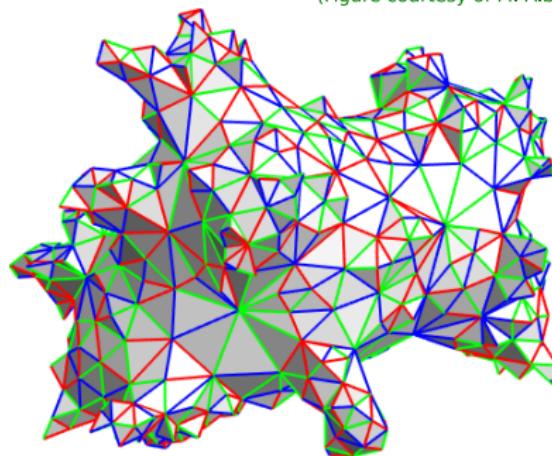

### C: Uniform quadrangulation (“pure gravity”)

## D: Triangulations decorated by Schnyder woods

(Figure courtesy of M. Albenque)

## Overview

	A: spanning tree	B: br. polymer	C: uniform quad.	D: Schnyder
$c$	-2	" $\infty$ "	0	$-25/2$
$\gamma_s$	-1	$1/2$	$-1/2$	-3
$d_s$	2	$4/3$	2	2
$d_H$	$\frac{3+\sqrt{17}}{2} \approx 3.56$	2	4	$\frac{5+\sqrt{41}}{4} \approx 2.85$
